

Remove Twos

Lastname_prefExer01.cpp

Write a program that removes all values that are divisible by two from an array of integers.

PROGRAM DESIGN

Take in an array of up to 10 integers. Ask the user for the value of each element. A -1 ends the input process. Remove the values in the array that are divisible by two. Save your work as *Lastname_prefExer01.cpp*

INPUT

The line should contain the values that are to be stored in the array. A -1 value should end the input.

OUTPUT

After the input line, your program should print the a new array with the divisible by two values removed.

SAMPLE INPUT	SAMPLE OUTPUT
10 9 8 7 6 5 4 3 2 1	9 7 5 3 1
10 9 8 7 -1	9 7
1 1 1 2 2 1 3 5 2 -1	1 1 1 1 3 5
1 1 1 -1	1 1 1
0 1 2 3 999	1 3 999
